Backup as a Service (BaaS)

Veeam Cloud Connect Backup from **Info Solutions and** Green Cloud Technologies.

Whether you are installing a primary backup solution or complementing an existing one with a additional target or repository, Green Cloud's backup solution powered by Veeam provides a remote, secure, cloud-based storage destination for existing server infrastructures.

For more information go to gogreencloud.com.

SEAMLESS, EFFICIENT AND SECURE BACKUP.

Veeam Cloud Connect makes it easy to get your backups offsite to a hosted backup repository (called a cloud repository) without the cost of managing a second site.

CLOUD CONNECT IS:

Seamless. Use your cloud repository like a local backup repository. Simply open the Veeam backup console and make your cloud repository a target for any backup or backup copy job. There is no additional download or Veeam licensing required.

Efficient. Leverages forever-incremental backups, in cloud synthetic fulls, built-in WAN Acceleration* and more to minimize data transfer while maximizing restore points. Get your backups off site quickly and easily without adding bandwidth.

Secure. Rest easy by encrypting your backup at source, in flight and at rest, without negatively impacting data transfer to the cloud (thanks to content-aware compression and WAN Acceleration*). Cloud Connect's multi-tenant capabilities also ensure that your data is as safe and confidential as it would be in your own dedicated offsite repository.

SERVICE OPTIONS & SPECIFICATIONS

STANDARD	PREMIUM
• 500GB storage • Per GB pricing model • Repository in single data center • Up to 5 VMs at 100GB each (additional VMs at additional cost)	• 500GB storage • Per GB pricing model • Repository data replicated to second data center • Up to 5 VMs at 100GB each (additional VMs at additional cost) • WAN acceleration available*

10 Mb/s bandwidth provided at no extra charge.

DATA RECOVERY
Data can be retrieved in two ways:
1. "Over the Wire"(dependent on available bandwidth).
2. Physical Media encrypted and shipped to site. (See Data Export Fees.)

*WAN acceleration is enabled upon request. Available only with Premium option with Veeam 8 Enterprise Plus edition.
